MRR Growth Trajectory

Monthly Recurring Revenue by scenario over 12 months

Key Growth Drivers

Outreach Engine (Primary Growth Lever)

Your automated lead scraper + email outreach is unique in the market. As warm-up progresses from 25/day to 200/day, you'll be touching 6,000 contractors/month by July. At a 2.5% conversion rate, that's 150 new signups/month on autopilot.

SEO Pages (Compounding Channel)

96 state/service pages are indexed and building authority. Expect 50-200 organic visitors/month by month 6, growing to 500-1,000 by month 12. This is free, compounding traffic that reduces CAC over time.

Affiliate Program (Viral Loop)

Every user gets a referral code with 20% commission. As your user base grows, each happy contractor becomes a potential sales channel. Expect affiliates to contribute 10-20% of new signups by month 9.

Procore Trust Engine (Enterprise Unlock)

Procore integration positions ProBid for larger contractors and GCs. This is the path from \$25/mo Pro users to \$55/mo Business users and eventually enterprise contracts.

Risks, Sensitivities & Next Moves

What Could Go Wrong

Email Deliverability Drops

If outreach emails start hitting spam, the entire growth engine stalls. Mitigation: Dedicated sending domain, proper DKIM/SPF/DMARC, warm-up schedule, bounce/complaint monitoring (already built).

Low Free! → Paid Conversion

If contractors try the free estimates but don't see enough value to pay \$25/mo, growth flatlines. Mitigation: Improve onboarding, add more job types, show ROI calculator ("you saved X hours this month").

High Churn (>8%/mo)

SMB tools have notoriously high churn. If contractors sign up for one project and cancel, MRR growth is a treadmill. Mitigation: Annual plans at discount, drip content showing ongoing value, team features for stickiness.

Competitor Response

Handoff cuts pricing or Jobber adds AI estimating. Mitigation: Lead gen + outreach moat is very hard to replicate, 12-18 month head start.

Highest-Impact Actions for Next 90 Days

Week 1-2: Get to 10 Paid Users

Personal outreach to the 277 scraped leads who are best fits. Offer a "founding member" discount. Goal: validate conversion funnel with real data.

Week 3-4: Optimize Onboarding Flow

Track where free users drop off. Add progress indicators, sample estimates, and "your first estimate" walkthrough. Every 1% improvement in free! → paid conversion is worth more than 1,000 extra leads.

Month 2: Launch G2 Review Campaign

Target 25+ reviews. This unlocks G2 category visibility and provides social proof for the landing page. Offer Pro credit per review.

Month 3: Ship Mobile PWA / App

Add install prompt + App Store listing. This is the single biggest feature gap vs. competitors and unlocks a new discovery channel.
